

- The following park improvements were completed in 2021: new park house with public bathrooms, classroom and gathering space, and park maintenance and ranger contact space; refurbished and ADA enhanced cobblestone walkway from N. 8th entrance into the park; interpretive panels honoring Marsha P. Johnson's life and civil rights work and community; and refurbished concrete event pads.
- Thanks to extensive community input and enhanced design, the following Phase 2 improvements will be completed in 2022: sitewide stormwater management system, permeable pathways, new park furnishings, extensive new landscaping and installation of a great lawn.
- This Phase 2 work will mobilize in mid-January and be completed by Summer 2022.
- The park house, dog run, and concrete event / activity pads will remain open to the public throughout the Phase 2 construction. The north section of the park will be temporarily limited during some of the Phase 2 construction.
- In addition, NYS Parks has convened an Art Advisory Committee including MPJ's family members, members of the LGBTQ+ community, local community members and public art experts to help guide selection of public art to be installed at the park gateway and inside the park. NYS Parks is committed to installing the 2 public art works by late 2023.
