NEW YORK STATE | Parks, Recreation and Historic Preservation

Request for Navigational Aid (s) Placement

Note: Please read all instructions before filling out this form. Please write legibly.

Danger Markers are typically placed where known water depths are less than 4 feet at distances greater than 100 feet from shore. Danger Markers or Regulatory Marks may be placed within 100 feet from shore when such placement is deemed necessary to public safety. Examples of obstructions, both natural and man-made, include sunken islands, rock piles, abandoned cribbing, wrecks, old piles or anything else below the waters surface. Obstructions that may also warrant marking could include piers, docks and partially submerged islands that otherwise can not be readily detected by boaters while underway, especially if the obstruction lies in an area heavily used by boaters or within close proximity to a navigable channel.

- INSTRUCTIONS -

1. Please use this form for requests on the following bodies of water only:

Allegheny Reservoir	Keuka Lake
Black Lake	Lake Bonaparte
Canadarago Lake	Oneida Lake
Canandaigua Lake	Onondaga Lake
Cayuga Lake	Otsego Lake
Chautauqua Lake	Owasco Lake
Conesus Lake	Rushford Lake
Cuba Lake	Sandy Pond
Delta Lake	Saratoga Lake
Findley Lake	Seneca Lake
Higley Flow	Silver Lake
Irondequoit Bay	Skaneateles Lake

2. Attach one drawing or section of a chart showing the general location of the obstruction on the body of water. This drawing should show as much of the lake as possible along with geographic points of reference.

3. Attach a second drawing showing the specific area in which the hazard is located. Indicate position, distance from shore, distance from other objects in the vicinity, etc.

4. If possible, please provide a GPS position of the hazard in the space provided.

5. Please mail the completed package to the Bureau of Marine Services at the address provided above.
